WATERJETS UNLIMITED ADDS A DYNAMIC WATERJET SYSTEM TO THEIR ARSENAL

Long Island, New York – Waterjets Unlimited has announced the recent addition of a Flow™ dynamic waterjet system into their arsenal of waterjet cutting equipment.

The dynamic waterjet system is a breakthrough in the cutting process allowing for more accurate parts at significantly higher cutting speeds than parts cut with conventional waterjet. “We are excited about this new dynamic system” offers Mark Grindel, President of Waterjets unlimited, “Now we can offer even higher quality critical parts by reducing steam lag significantly and cut parts up to 400% faster then before”.

Waterjets Unlimited is a leading provider of material cutting services, cutting complex and intricate shapes. Waterjet Cutting is ideal for a wide range of materials from soft foams and plastics to stone and hardened steels. For high volume production or even single piece prototypes, Waterjets Unlimited has proven to be one of the highest quality firms in the business.
